

How our team can help you to succeed in the USA?

There are unique challenges with doing business in the USA. Our experienced team can help you understand these challenges, spot opportunities for growth, create value, manage risk and work with you to put all the pieces together. Some of the ways we can help are highlighted below.

Coordinated global advisory services

We can coordinate with PwC United States to provide you with seamless cross-border accounting, tax compliance and advisory services.

Tax structuring for growth

We can give you practical advice on the best structure for your business in the United States that is aligned with the commercial and tax objectives of the business and its owners.

Mobile employees

We can help you identify and manage potential tax compliance obligations for both the business and individuals created by employees spending time in the United States, and also identify activities that could inadvertently create a tax presence in the United States for the New Zealand business.

Reviewing your supply chain to minimise tax compliance obligations

United States tax compliance obligations can be complex and costly with Federal, State, City and Sales taxes to consider. We can work together with PwC United States to streamline your supply chain and identify opportunities to minimise tax compliance obligations.

Practical transfer pricing solutions

We will work with you to identify and implement practical and defensible transfer pricing strategies that are in line with your organisations tax planning objectives and value creation strategies.

Cloud accounting

We can help you leverage the power of the cloud to help you stay connected anywhere in the world so that you can make better decisions using real time information.

We look forward to working with you
